

Aerial Side Trimming

Aerial Sawing

- Ideal for difficult to access rights-of-way in steep or swampy terrain
- Powerful 10-bladed saw
- Distance of the saw below the helicopter is adjustable depending on terrain
- Cost effectively completes difficult/remote vegetation management projects

Chemical Side Trimming

- Highly efficient treatment method
- Spray system can be modified to adjust nozzle spacing, flow rate and spray direction
- Extends the maintenance cycle by inhibiting growth on the treated limbs
- Eliminates the need to handle trimmings on the ground
