STORM & EMERGENCY RESTORATION SERVICES

ASPLUNDH
ANYTIME. ANYWHERE.
EXPERT HELP IS JUST A PHONE CALL AWAY

Asplundh’s storm coordination team, located at our headquarters in Willow Grove, Pennsylvania, monitors weather systems all year round. Often, before you even call, preparations are being made to respond. At your request, we can stage crews ahead of time just outside the storm zone. If need be, our mobile storm center will come to your area to support the vast administrative and communications needs of a large force of outside crews.

Storm restoration working conditions are even more hazardous than normal. Add in long hours and extreme weather conditions, and you’ve got a potential recipe for disaster. That’s why Asplundh sends corporate safety supervisors and regional safety superintendents to accompany all mobilized crews on emergency storm work.

By using daily conference calls, Asplundh’s safety team gathers data on changing conditions, new hazards and near-misses. Daily safety stand-downs allow them to communicate this information to our crews to help them work safely.
WHEN MOTHER NATURE STRIKES ...

When Mother Nature is at her worst, Asplundh is at its best.

Despite the best efforts of a utility vegetation management program, nothing can prevent the kind of damage caused by major hurricanes, ice storms, tornadoes and blizzards. Once the damage is done, it’s a relief to know there’s an emergency response team like ours that is ready to work quickly and safely to help you restore power.

Asplundh has unparalleled resources in skilled manpower and specialized equipment throughout North America ready to assist you. All you have to do is call your nearest Asplundh representative or our toll-free hotline.

Asplundh is ready to serve you at any hour, day or night. And since our crews work near energized conductors every day, they clearly understand the hazards of the job and the importance of productivity.
Asplundh can provide logistics support to provide a centralized staging area, or “tent city” environment for the outside workforce supporting your restoration efforts. Providing a clean, safe and comfortable staging area allows storm restoration crews to rest effectively and be more productive and safe on the job.

Logistics support can include:

- Tents, cots and sleeping bags
- Mobile sleeper units
- Food service
- Water and ice
- Showers and toilet facilities
- Laundry service
- Fuel
- Bus transportation
- Security
- Communications
- First aid

It’s nice to know that Asplundh is able to make your job easier with logistics support.
STORM DAMAGE ASSESSMENT

To rapidly assess the extent of storm damage, Asplundh can deploy trained storm damage assessors (SDAs) to identify circuit conditions and locations where special crews or equipment may be required to restore power. SDAs are often the utility’s first contact with consumers and professionalism is of the utmost importance.

PRE-EVENT PLANNING

A quick response to a storm disaster is most successful if you take time to plan ahead. Our local Asplundh representatives will gladly meet with you to discuss emergency procedures and answer any questions you might have in order to avoid confusion in the midst of a storm situation. Let Asplundh’s experience and resources help you be prepared for the unexpected.
